

q General Description

The media player solution of JBOSN Operating System is very simple now. But the structure of player is fixed. If you want and have the library of the other audio library, then insert the library into the player. Currently, MP3, OGG, WAV file can be played. Many other format audio file will be supported.

The play list function is not inserted. Next version will have that function.

Enjoy the sound through JBOSN RTOS media player solution.
